

# INTELLIGENT ACTIVE MANAGEMENT

Powering Microsoft Azure, Modern Work & Security with proactive automation and insight—now with Microsoft 365 Copilot enablement and extensibility.

## What is Intelligent Active Management?

- **Proactive & Predictive**  
Move beyond reactive support. Use data, automation and **AI** to anticipate issues, optimise costs, and elevate experience across Azure and Microsoft 365.
- **Secure by Design**  
Strengthen identity, device, and data protection with policy-driven guardrails and continuous posture improvement using Modern Work & Security capabilities.
- **Adoption & Change**  
Drive measurable Modern Work adoption through readiness, enablement, and champions to unlock productivity with Microsoft 365 and Copilot.

## Microsoft 365 Copilot: Readiness, Adoption & Extensibility

### Readiness (Modern Work & Security)

- Data & Security prep (Purview labels, access hygiene, oversharing reduction).
- Licensing & Tenant prerequisites verification.
- Governance for prompts, plugins, and extensions in regulated environments.

### Enablement & Adoption

- Role-based scenarios for Sales, Finance, HR, Operations, and IT.
- Champion network, bite-size learning paths, office hours.
- Usage & impact dashboards with security & compliance KPIs.

### Extensibility with Copilot Studio

- Build custom copilots with enterprise connectors and policies.
- Grounding on internal content with secure retrieval (Teams/SharePoint/Graph).
- Plugins & Teams app experiences to automate end-to-end workflows.

## Your Journey

Phase	What Happens	Outcomes
<b>Discover &amp; Assess</b>	Usage baseline, security posture, and Microsoft 365 Copilot readiness assessment.	Readiness report, prioritised Copilot use cases, metrics baseline.
<b>Design &amp; Prepare</b>	Architecture, governance, data protection, and adoption plan aligned to Modern Work & Security.	Deployment & enablement plan with success KPIs.
<b>Implement &amp; Activate</b>	Enable Microsoft 365 Copilot, deploy extensions, and secure content grounding.	Live scenarios across roles; measurable time-savings.
<b>Monitor &amp; Optimise</b>	Dashboards for usage, impact, and security; iterate on prompts & workflows.	Uplift in productivity, reduced risk, improved adoption.
