

CREATING THE FUTURE OF EFFICIENCY

Leverage Intelligent Process Automation (IPA) with Automation Anywhere - amplified by 4Sight's 4flow workflow intelligence and 4automate delivery accelerators.

What is Intelligent Process Automation?

- **End-to-end Orchestration**
Connect apps, data, and people; automate hand-offs; remove rekeying and delays across Finance, HR, and Operations.
- **AI-powered Decisions**
Classify, extract, and route with AI; improve accuracy and speed of decision-making and case handling.
- **Human-in-the-Loop**
Blend bots with approvals and exceptions so teams stay in control where it matters most.

Automation Anywhere Partnership

4Sight is a trusted Automation Anywhere partner, delivering enterprise-grade intelligent automation that goes beyond traditional RPA.

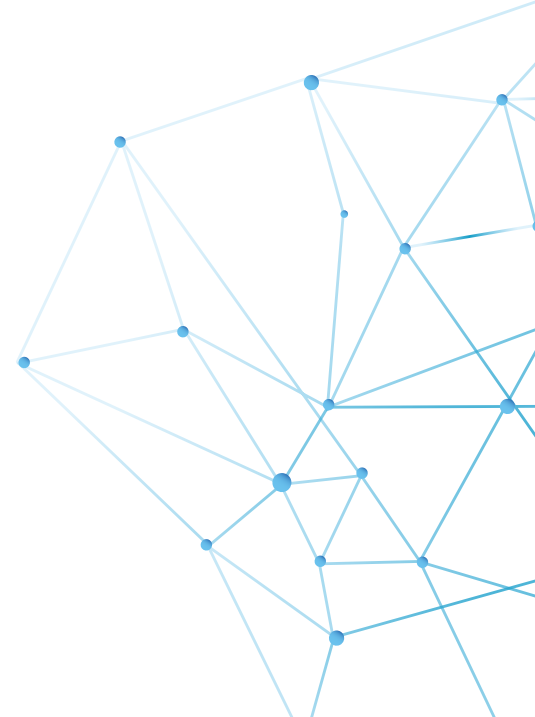

- Build & run intelligent bots (attended/unattended) on the A360 platform.
- Document processing & conversational automation with Azure integration.
- Cloud-native scale, governance, and security.

The Problems We Solve

- **Manual, repetitive work**
Slow cycle times, high error rates, low employee morale.
- **Fragmented workflows**
Disconnected systems across Finance, HR, IT and Operations create rework and delays.
- **Limited visibility & control**
No real-time insight into process health, SLAs, failure points, or ROI.
- **Scaling & governance**
Bots that are hard to audit, secure, and standardise across teams.
- **High operational cost**
Process waste, delayed order processing, compliance risks and customer impact.

How Customers Benefit

- **Faster processes**
Cut cycle times with end-to-end orchestration and AI-assisted decisions.
- **Quality & compliance**
Reduce errors and standardise controls with reusable components and guardrails.
- **Real-time visibility**
4flow dashboards reveal bottlenecks, SLA risks, and value realisation.
- **Scale with confidence**
4automate accelerators, patterns, and CI/CD speed delivery and simplify maintenance.
- **Cost reduction & productivity**
Automate repetitive work so teams focus on higher-value tasks and customers.

Introducing 4flow & 4automate

4flow — Workflow Intelligence & Visibility

- Out-of-the-box dashboards for process performance, SLAs, and bottlenecks
- Operational telemetry from bots, users, and apps in one place
- Azure-hosted analytics for real-time monitoring and optimisation

4automate — Delivery Accelerator Toolkit

- Reusable components, connectors, and patterns for A360, Power Automate & Logic Apps
- Quality & security guardrails with CI/CD for bots and workflows
- Templates for exception handling, approvals, and audit logging

Your Automation Journey

Phase	Activities	Outcomes
Assess	Process discovery, ROI & readiness assessment	Prioritised backlog with business case
Pilot	Stand up first bots using 4automate components	Validated value & runbook for scale
Scale	CoE operating model + 4flow dashboards for governance	Consistent delivery, visibility, and control
Run	Monitor, alert, and iterate using 4flow insights	Stable automations with continuous optimisation

Use Cases

Finance

- Invoice capture and 3-way match
- Payment posting and reconciliation
- Spend analytics & alerts

Operations

- Order-to-cash orchestration
- Inventory updates and notifications
- Preventive maintenance scheduling

HR & IT

- On/Off-boarding workflows
- Access provisioning & audits
- Service desk triage & automation

Ready to accelerate productivity with IPA?

Book a personalised session to see how Automation Anywhere with 4flow & 4automate can streamline your processes.
